

Facilitator cue cards (print-ready)

The holdable subset of the [facilitator guide](#): one card per moment, with the line to say and the thing to watch. Cut along the rules. Times are wall-clock — the workshop is two 30-minute parts split by lunch.

✂ — — — — —

12:00 · WELCOME + STANCE (Part 1)

- **Say:** "We are here for *discernment*, *not enthusiasm* — a deeper insight into the technology, not training on any one tool. Whatever your confidence, you are welcome."
- **Do:** read the disclaimer aloud; land *friction is a signal*.
- **Watch:** start on time; this is the conceptual part — keep it brisk.

✂ — — — — —

12:03 · SAVED OR BURNED

- **Say:** "One sentence each with your neighbour: the last time an AI tool *saved you* or *burned you*."
- **Do:** two minutes, in parallel, then pull the room back.

✂ — — — — —

12:05 · A LONG LINE OF TOOLS

- **Say:** "AI is the latest in a long line of productivity tools — calculator, computer, spreadsheet, now generative AI — in an economy that rewards output. Not whether to use it, but how, with discernment."
- **Do:** the chain on screen; a couple of minutes.

✂ — — — — —

12:08 · GETTING STARTED (no experience needed)

- **Say:** "A chat assistant: you type a request, it writes back. Pick one free tool; say who you are, what you want and what good looks like, then push back."
- **Do:** point to the starter prompts; reassure — mixed groups are a strength, no one is behind.

✂ —————

12:10 · FRICTION IS A SIGNAL

- **Say:** "When the tool resists you, that friction is information — it marks where your judgement does the work."
- **Do:** Lee et al. and Drosos et al. in a sentence each. Do not lecture.

✂ —————

12:14 · SPECTRUM · RED LINES · ETHICS

- **Do:** one breath each (slides 10–12). Name the teaching angle: students' data, assessment integrity, disclosure.
- **Watch:** these are reference frames for Part 2, not content to master now.

✂ —————

12:21 · THE BIGGER QUESTIONS + HUMAN-IN-THE-LOOP

- **Say:** "Zoom out: the thinking/writing shift; fairness — who is helped, who is left out (language, support, career stage, background); and disclosure. No answers — notice them in Part 2."
- **Do:** then human-in-the-loop and the map (slide 14): accountability stays human.

✂ —————

12:26 · WHAT PART 2 ASKS + FORM GROUPS (end of Part 1)

- **Say:** "These ideas — and the bigger questions — are the rubric and reflection you will fill. Now: groups of five, gather at the idea on screen; the letter is your track."
- **Do:** preview the rubric (slide 15) and the tracks; then to lunch. End Part 1 at 12:30.

✂ —————

12:30–13:15 · NETWORKING LUNCH (not your session)

- **Do:** a networking break; Part 2 at 13:15.

✂ —————

13:15 · SETTLE IN (Part 2)

- **Say:** "Re-find your group. Quickly agree your **one** problem — the seed, or a real one someone brought. Open the app (genai-rt.web.app); read out the passcode. Red lines on."
- **Do:** about three minutes in all — regroup, agree the one problem in roughly a minute, then open the app and read out the passcode. Keep it tight so it does not eat into the fifteen-minute applied

session.

✂ — — — — —

13:18 · APPLY IT (15 min)

- **Let them work.** Stop sensitive data; unstick stalls; one provocation each.
- **Push:** the **automation–steering map** — interwoven or staged? Keep one caught error.

✂ — — — — —

~13:26 · PIVOT 🕒

- **Say:** “Thirty seconds, keyboards down. What did it make easier, and at what cost? Where did it resist you? Held the red lines? Now switch: building → interrogating.”

✂ — — — — —

13:33 · LIGHTNING ROUND (7 min)

- **Say:** “45 seconds, one insight, no slides: the biggest limitation, or the best safeguard.”
- **Do:** visible timer; 45 s each for as many as fit, then a one-line harvest from the rest. Jot each group’s thread; approve their note on the dashboard as it lands.

✂ — — — — —

13:40 · CLOSE (5 min)

- **Synthesise, don’t summarise:** name two or three threads from the round.
- **Land:** friction as signal · the spectrum · the red lines · human-in-the-loop.
- **Give:** the take-home actions; further reading; the follow-up. Close at 13:45.

✂ — — — — —

A personal selection, made in the facilitator’s own capacity. It is not the position of the University of Oxford (the facilitator’s employer) or of the host, and it is not legal advice.

Facilitator run sheet

The single-glance timeline for the day. Operational only — the *why* is in the [facilitator guide](#); the holdable prompts are on the [cue cards](#). Slide numbers refer to [slides.md](#).

A featured workshop in **two 30-minute parts**, split by a networking lunch.

Before Part 1 (see the morning checklist)

When	Action
11:45	Projector on, deck open in presenter mode, Wi-Fi and power confirmed.
11:50	Create and pin the submission issue — your link-collection record (participants don't post to it).
11:52	Reset the app (genai-rt.web.app): set the session passcode, arm the timer and confirm the private dashboard is ready (see day-of reset). No pre-named notes needed.
11:55	Lay out printed role cards, the data decision aid and worked examples on tables of five.
11:58	Visible timer ready, title slide up (slide 1). Start at 12:00.

Part 1 · Conceptualising the use of AI in research · 12:00–12:30

Clock	Segment	Slides	Facilitator does
12:00	Welcome + stance	1–5	Start on time. Disclaimer aloud. <i>Discernment, not enthusiasm</i> ; aim is insight, not tool training; all welcome.
12:03	Saved or burned	6	A sentence each with a neighbour — 2 min, then move on.
12:05	A long line of tools	7	AI in the history of tools and the productivity economy: not whether, but how.
12:08	Getting started	8	What these tools are; pick one free; how to ask. For all levels.
12:10	Friction is a signal	9	The spine. Lee et al. and Drosos et al. in a sentence each.
12:14	Spectrum · red lines · ethics	10–12	One breath each; name the teaching angle (students' data, assessment, disclosure).
12:21	The bigger questions	13	Paradigm shift, fairness, disclosure — pose as live questions for Part 2.
12:23	Human-in-the-loop + map	14	Accountability stays human; interwoven or staged.
12:26	What Part 2 asks + form groups	15–16	Rubric preview; groups of five form at a seed. Pre-assign each group its track , and point it to the matching worked example and starter prompts, so Part 2 starts fast.

Networking lunch · 12:30–13:15

When	Action
12:30	Not your session; a networking break before Part 2.

Part 2 · Practical AI for research and teaching · 13:15–13:45

Clock	Segment	Slides	Facilitator does
13:15	Settle in	18–20	Re-find groups; agree the one problem (60 s); App open (genai-rt.web.app); read out the passcode; red lines on.
13:18	Apply it	21–26	Circulate. Stop sensitive data; unstick stalls; one provocation each. Make groups sketch the map (interwoven/staged).
~13:26	Pivot	27	30 s, keyboards down. Stop building, start interrogating.
13:33	Lightning round	28	Visible timer. 45 s each — every group fits in ~7 min. Jot threads; approve each group's submission on the dashboard as it presents (collect a HackMD link only for any fallback group).
13:40	Close	29–35	Synthesise 2–3 threads. Take-home actions. Reading. Follow-up. Close at 13:45.

After

When	Action
Same day	Check every group's link is in the issue; nudge any missing.
+1–2 days	Export the approved work from the dashboard (Export approved (Markdown)); export any HackMD-fallback note too; archive under <code>submissions/</code> (see <code>submissions/README.md</code>).
+3–5 days	Send the follow-up email with the responsible-use commitment and the archive link.

A personal selection, made in the facilitator's own capacity. It is not the position of the University of Oxford (the facilitator's employer) or of the host, and it is not legal advice.

Morning checklist

Tick before the room fills. The session is low-tech by design, so most risk is in the first ten minutes.

Technology

- [] Projector / screen working; laptop output tested at the room's resolution.
- [] Deck open: either `dist/slides.html` in a browser (presenter view) or `dist/slides.pdf` as a fallback. (Rebuild with `npm run build` if needed.)
- [] Wi-Fi confirmed on a guest device — the network participants will actually use.
- [] Power: enough sockets / extension leads for tables of five.
- [] **genai-rt.web.app** (the groupwork app) reachable on the guest network; facilitator Google sign-in to the dashboard works.
- [] A chat tool (ChatGPT / Claude / Gemini / Copilot) reachable on the guest network.
- [] A visible **timer** (phone, slide timer or kitchen timer) for the segment timings and the 45-second lightning round.

App reset (facilitator)

- [] The groupwork app reset for this session: set the session passcode, arm the timer and sign in to the private dashboard. See [Facilitator day-of reset](#) for the full app reset.
- [] Dashboard reachable and clear of any previous session's submissions, ready to approve groups as they submit.

Printed materials (per table of five)

- [] [Role cards](#) — one set.
- [] [Data decision aid](#) — one copy.
- [] [Worked examples](#) — one copy (offline fallback).
- [] Spare pens and paper (HackMD or paper is the fallback if a group cannot use the app).

Facilitator kit

- [] [Cue cards](#) printed and in order.
- [] [Run sheet](#) ready.
- [] Water. A clock you can see. A way to get the room's attention.

Placeholders filled

- [] Name, date, venue, time and repository URL filled in (the affiliation, disclaimer and logo are already set to the facilitator's own — Department of Education, University of Oxford).

- [] Official University of Oxford logo dropped into `themes/workshop.css` (replacing the placeholder), and the deck rebuilt.
-

A personal selection, made in the facilitator's own capacity. It is not the position of the University of Oxford (the facilitator's employer) or of the host, and it is not legal advice.
