

Facilitator cue cards (print-ready)

The holdable subset of the facilitator guide: one card per moment, with the line to say and the thing to watch. Cut the cards apart along the rules. Times are wall-clock, and the workshop is two 30-minute parts split by lunch.

✂ —————

12:00 · WELCOME AND STANCE (Part 1)

- **Say:** 'We are here for discernment, not enthusiasm: a deeper insight into the technology, and no training on any one tool. Whatever your confidence, you are welcome.'
- **Do:** read the disclaimer aloud, and make the point that friction is a signal.
- **Watch:** start on time. This is the conceptual part, so keep it brisk.

✂ —————

12:03 · SAVED OR BURNED

- **Say:** 'One sentence each with your neighbour: the last time an AI tool saved you or burned you.'
- **Do:** two minutes, in parallel, then pull the room back.

✂ —————

12:05 · A LONG LINE OF TOOLS

- **Say:** 'AI is the latest in a long line of productivity tools, from the calculator and the computer to the spreadsheet and now generative AI. Our institutions reward output, so we need to decide when the tool helps and when it does not.'
- **Do:** show the chain on screen, and take no more than a couple of minutes.

✂ —————

12:08 · GETTING STARTED (no experience needed)

- **Say:** 'A chat assistant takes a request and writes back. Pick one free tool. Say who you are, what you want and what a useful response would look like, then push back.'
- **Do:** point to the ready examples in the group pack, and reassure the room that mixed groups are a strength and no one is behind.

✂ — — — — —

12:10 · FRICTION IS A SIGNAL

- **Say:** 'When the tool resists you, that friction is information. It marks where your judgement does the work.'
- **Do:** Lee et al. and Drosos et al. in a sentence each. Do not lecture.

✂ — — — — —

12:14–12:21 · SPECTRUM · RED LINES · ETHICS

- **Do:** one breath each (slides 10–12). Name the teaching angle: students' data, assessment integrity, disclosure.
- **Watch:** these are reference frames for Part 2, and there is no need to master them now.

✂ — — — — —

12:21 · THE BIGGER QUESTIONS AND THE HUMAN IN THE LOOP

- **Say:** 'Zoom out: the shift between thinking and writing; fairness, meaning who is helped and who is left out by language, support, career stage or background; and disclosure. There are no answers today, so notice them in Part 2.'
- **Do:** then the human in the loop and the map (slide 14). Accountability stays human.

✂ — — — — —

12:26 · WHAT PART 2 ASKS, THEN FORM GROUPS (end of Part 1)

- **Say:** 'Part 2 puts these ideas to work. Now form groups of five: gather at the idea on screen, and the letter is your track.'
- **Do:** show the three things Part 2 asks (slide 15) and the tracks (slide 16), then send them to lunch. End Part 1 at 12:30.

✂ — — — — —

12:30–13:15 · NETWORKING LUNCH (not your session)

- **Do:** a networking break. Use part of it for the app reset if it is not already done. Part 2 starts at 13:15.

✂ — — — — —

13:15 · SETTLE IN (Part 2)

- **Say:** 'Re-find your group. Quickly agree one problem: the seed or a non-confidential task someone brought. Open the app at genai-rt.web.app. Here is the passcode. Keep the red lines in mind.'
- **Do:** take about three minutes: regroup, agree the problem in roughly a minute, then open the app and read out the passcode. Protect the fifteen-minute build window.

✂ — — — — —

13:18 · APPLY IT (15 min)

- **Let them work.** Stop sensitive data, unstick stalls and offer one provocation each.
- **Push:** a caught error first, then the one line for the room. The optional boxes in the app are for groups with time left.

✂ — — — — —

About 13:26 · PIVOT 🕒

- **Say:** 'Thirty seconds, keyboards down. What did it make easier, and at what cost? Where did it resist you? Have you held the red lines? Now switch from building to interrogating.'

✂ — — — — —

13:33 · LIGHTNING ROUND (7 min)

- **Say:** 'One insight each and no slides. I will call the time. Give us the biggest limitation, the best safeguard or how your field over- or under-uses AI here.'
- **Say, before they submit:** 'Tick the sharing box at the foot of the form only if you are happy for your note to join the public archive. It is optional.'
- **Do:** visible timer. 45 seconds each with eight groups, or announce 35 seconds if there are nine or ten, since each handover costs five to ten seconds. Still behind after six? Take one line from the rest. Jot each group's thread, and leave every approval until after the session.

✂ — — — — —

13:40 · CLOSE (5 min)

- **Synthesise the round** by naming two or three threads from it.
- **Connect:** friction as signal, the spectrum, the red lines, the human in the loop.
- **Give:** the take-home actions, the further reading and the follow-up. Close at 13:45.

✂ —————

A personal selection, made in the facilitator’s own capacity. It is not the position of the University of Oxford (the facilitator’s employer) or of the host, and it is not legal advice.

Facilitator run sheet

The quick timeline for the day. It is operational only: the reasoning is in the [facilitator guide](#), and the holdable prompts are on the [cue cards](#). Slide numbers refer to [slides.md](#).

A featured workshop in two 30-minute parts, split by a networking lunch.

Before Part 1 (see the [morning checklist](#))

When	Action
11:45	Projector on, deck open in presenter mode, Wi-Fi and power confirmed.
11:50	Create and pin the fallback-links issue, so that it is there if a group fails over to HackMD later (participants do not post to it).
11:52	Reset the app (genai-rt.web.app): sign in to the private dashboard, clear rehearsal groups, set the session passcode and set the timer's minutes without starting it (see the day-of reset). No pre-named notes are needed.
11:55	Lay two group sheets and one group pack on each table of five, with spare pens and paper. The sheet is the one people read, so put it on top. Post the ten seed ideas around the room, each with its track letter, ready for the 12:26 formation.
11:58	Visible timer ready, title slide up (slide 1). Start at 12:00.

Part 1 · Conceptualising the use of AI in research · 12:00–12:30

Clock	Segment	Slides	Facilitator does
12:00	Welcome and stance	1–5	Start on time. Read the disclaimer. Introduce the critical stance and welcome every level of experience.
12:03	Saved or burned	6	A sentence each with a neighbour, two minutes, then move on.
12:05	A long line of tools	7	AI in the history of tools and the productivity economy: the question is how, with discernment.
12:08	Getting started	8	What these tools are, pick one free tool, how to ask. For all levels.
12:10	Friction is a signal	9	The central idea. Lee et al. and Drosos et al. in a sentence each.
12:14	Spectrum, red lines, ethics	10–12	One breath each. Name the teaching angle (students' data, assessment, disclosure).
12:21	The bigger questions	13	Paradigm shift, fairness, disclosure, posed as live questions for Part 2.
12:23	Human in the loop and the map	14	Accountability stays human. Introduce interwoven and staged oversight.
12:26	What Part 2 asks, then form groups	15–16	Two minutes on the three things Part 2 asks, two on formation. Groups of five form at a seed, with the seed letters posted around the room beforehand so that people walk to a sign. Each group's track follows from its seed, so point it to the ready example for that track in the pack.

Networking lunch · 12:30–13:15

When	Action
12:30	Not your session, but a networking break before Part 2. Leave slide 17 up throughout: it is the only thing telling people to come back to the same table. Re-check the dashboard once (passcode set, no rehearsal groups, timer not running).

Part 2 · Practical AI for research and teaching · 13:15–13:45

Clock	Segment	Slides	Facilitator does
13:15	Settle in and orient	18–24	Re-find groups, agree one problem in 60 seconds and open genai-rt.web.app. Read out the passcode and keep the red lines visible. Point to slides 21–24, but do not present them: the group sheet has the instructions.
13:18	Apply it	25	Press Start countdown as slide 25 goes up. If the settle-in runs late, set Minutes so the countdown still ends at 13:33. Circulate. Stop sensitive data, unstick stalls and offer one provocation to each group. Prioritise a caught error and a clear line for the room. Leave the optional boxes to groups with time left.
about 13:26	Pivot	26	Thirty seconds, keyboards down. Stop building, start interrogating.
13:33	Lightning round	27	Use a visible timer. Give eight groups 45 seconds each. With nine or ten, announce 35 seconds because handovers take time. Jot themes only and leave approvals until after the session. Collect a HackMD link only from a fallback group.
13:40	Close	28–34	Synthesise two or three threads. Take-home actions. Reading. Follow-up. Close at 13:45.

After

When	Action
Same day	Check that every app group is approved on the dashboard, and that any HackMD-fallback group's link is in the issue. Nudge any missing.
+1–2 days	Export the approved, consented work from the dashboard (Export approved (Markdown)), export any HackMD-fallback note too, and archive under <code>submissions/</code> (see submissions/README.md).
+3–5 days	Send the follow-up email with the responsible-use commitment and the archive link.

A personal selection, made in the facilitator's own capacity. It is not the position of the University of Oxford (the facilitator's employer) or of the host, and it is not legal advice.

Morning checklist

Tick these before the room fills. The session is low-tech by design, so most of the risk sits in the first ten minutes.

Technology

- [] Projector or screen working, with the laptop output tested at the room's resolution.
- [] Deck open: either `dist/slides.html` in a browser (presenter view) or `dist/slides.pdf` as a fallback. (Rebuild with `npm run build` if needed.)
- [] Wi-Fi confirmed on a guest device, on the network participants will actually use.
- [] Power: enough sockets and extension leads for tables of five.
- [] `genai-rt.web.app` (the workshop app) opens on a guest device and shows the login form, which is the proof that its code loaded rather than merely the page. The facilitator's Google sign-in to the dashboard works.
- [] A chat tool (ChatGPT, Claude, Gemini or Copilot) reachable on the guest network.
- [] A visible timer (phone, slide timer or kitchen timer) for the segment timings and the 45-second lightning round.

App reset (facilitator)

- [] The workshop app reset for this session: sign in to the private dashboard, clear any rehearsal groups, set the session passcode and set the timer's minutes without starting it. See the [day-of reset](#) for the full list.
- [] Dashboard reachable and clear of any previous session's submissions (clearing is console-only, so if anything is there, note it and clear it during the lunch reset), ready to approve groups as they submit.

Printed materials (per table of five)

- [] [Group sheet](#), two per table. It holds the whole of Part 2 on one side, so it is the sheet people actually read.
- [] [Group pack](#), one per table: a ready example and first prompts for each track, then the rubric and the fallback note.
- [] [Seed-idea signs](#), ten of them, one per page in A4 landscape, printed and posted around the room before 12:00. Each carries its track letter, and they are generated from the quick group seeds in `project_tracks.md`.
- [] Spare pens and paper (HackMD or paper is the fallback if a group cannot use the app).

Facilitator kit

- [] [Cue cards](#) printed and in order.

- [] Run sheet ready.
- [] Water, a clock you can see and a way to get the room's attention.

Details to confirm

- [] The name, date, venue, times and affiliation in the deck and the emails are yours (they are set to the facilitator's own: Department of Education, University of Oxford, and the University of Westminster on 9 September 2026).
 - [] The placeholders that remain were filled before sending: [VENUE] and [POLL URL] in the pre-workshop email, and [FEEDBACK URL] in the follow-up email.
 - [] The University of Oxford crest is embedded in themes/workshop.css (its source is assets/logo.svg), and the deck was rebuilt after any change.
-

A personal selection, made in the facilitator's own capacity. It is not the position of the University of Oxford (the facilitator's employer) or of the host, and it is not legal advice.
